

## **Amendments to the Specification**

Please insert the following paragraphs at the next line following line 20 on page 8 in the above-identified patent application:

Fig. 11 schematically shows a dispensing apparatus comprising a container formed in a flexible material; and

Fig. 12 schematically shows a dispensing apparatus comprising pumping means.

Please insert the following paragraphs at the next line following line 2 on page 24 in the above-identified patent application:

Referring to Figure 11, a dispensing apparatus 60 comprising a flexible container 61 having a tubular outlet 62 is schematically illustrated. The container 61 is formed in a flexible material so that manual squeezing of the container 61 by a user urges material from the container through the tubular outlet 62.

Referring to Figure 12, a dispensing apparatus 70 comprising a container 71 having a tubular outlet 72 is schematically illustrated. The dispensing apparatus 70 includes pumping system 73 for pumping material from the container 71 through the tubular outlet 72.
